You know what we call Colorado homeowners planning kitchen and bath upgrades in today's tough economic climate?

LUCKY!

Dear Colorado Homeowner,

Let's face it, these are very challenging times for our nation's economy, and the housing market is being hit harder than most. But rather than running scared, you're making plans to enhance your lifestyle, upgrade your home—and invest in your future. That takes guts.

As a savvy homeowner, you understand the value of great design, top quality cabinetry, and dependable service; you're concerned about reducing your carbon footprint; and you're determined to maintain the security of your most precious investment, your home. That's admirable.

However, unless you know—with complete certainty—how to implement a kitchen and bath design that will significantly enhance the value your home, you're taking big risks with the worth of your property and the security of your future.

That's not gutsy or admirable; that's crazy!

Do you know the best way to secure the value of your home in today's flagging economy? The answer is simple: you've got to spend smarter and make home improvements that add tangible value to your property. That's where we come in.

HELP HAS ARRIVED FOR COLORADO HOMEOWNERS!

Debra Toney, Kitchen & Bath Studios, the latest addition to the Debra Toney family of companies, is pleased to announce the opening of our Kitchen and Bath Studios in Denver. From comprehensive design services to locally manufactured cabinetry, **we've got everything you need to efficiently and effectively upgrade your home:**

- **Top-quality cabinetry:** No matter what style you're after—from Contemporary Italian to French Country to Eco-Sensitive—we build top-quality cabinetry rivaling the hottest manufacturers from Italy, Germany, Spain and Canada. And we do it all right here in Colorado!

- **Full-service or DIY, the choice is yours:**
  - **Do-it-yourselfer?** We'll provide custom cabinetry and local installation support.
  - **Have your own architect, builder or designer?** We'll work with them.
  - **Need design help?** We offer award-winning* design services.
  - **Want full-service?** We'll oversee your project from concept to completion, providing everything from design and installation services to financial management of the project and supervision of trade partners. We'll take care of all the details . . . so you don't have to!
- **Fast, efficient, service:** We produce top-quality cabinetry in as little as 3-weeks—and we always deliver on schedule. So you can say goodbye to delayed out-of-state or international shipments holding up (or destroying) your construction schedule.
- **Unrivaled post-installation services:** Because we manufacture our products locally, it doesn't take us 10-16 weeks to replace or service products (like it does with overseas manufacturers). In most cases, we can do it in just 24-48 hours. In a market where time really does equal money, that's *smart spending!*
- **Reduced carbon footprint:** Buying anything imported across an ocean means a container ship transported it. Just one container ship traveling one mile produces NOx emissions equaling 25,000 cars traveling the same distance.** For those dedicated to further reducing their carbon footprint, we offer a line of eco-friendly cabinetry.

To request more detailed information on our custom cabinetry and design services or to schedule a meeting, give us a **call right now at (303) 399-2677**. You'll be glad you did!

Sincerely,

Debra Toney
President, Debra Toney Kitchen & Bath Studios, A Debra Toney Company
